EXPERIENCE

Software Engineer   May 2018 - present
Walmart - Bentonville, AR

- Lead Frontend Developer of a nine person team building a custom ERP system integrating with microservice APIs (C#, Node, Python), legacy applications and third-party services.
- Lead Developer and Systems Architect for React UI Library suite encompassing designs for structural, presentational, chatbot and feedback components with dynamically rendered web documentation.
- Building modern backend APIs as Azure Functions (Node and C#) or standalone .NET Core Web APIs with extensive Swagger documentation to efficiently handle requests of up to 30,000 active users.
- Led 3 full-day workshops on design handoff between UX and development teams. Presented talks to multiple audiences promoting increased reusability in code and design.
- Support other teams' development projects as needed. I.e. project architecture mapping, specific feature development and application optimization.
- Mentor 5 junior developers and 1 junior designer with 1:1React teaching sessions and/or career and goal planning.

Mobile and Web Application Developer   Sept 2018 - present
Tabbert Technologies, LLC - Bentonville, AR

- Consulting for more than a dozen nonprofits and local businesses to create websites and applications using React, .NET Core (C#), and WordPress (JS/PHP).
- Focusing on reaching customers, donors, and recipients using modern UI/UX principles and SEO optimization for maximum reach.

Frontend Developer (Remote)   Jul 2017 - Jun 2018
Chingu - Toronto, Canada

- Front end development of the original Chingu Developer Network client using React and interfacing with a Node/GraphQL/PostgreSQL backend.
